Assignment	Title
------------	-------

Name:	
Date: _	

Instructions

Answer all the questions and return to the teacher by the end of the week. Section A questions shouldn't cause you any trouble. Section B is designed to be more challenging.

Section A

1. Define the term 'minimal polynomial'.

2. Evaluate the following integral

$$\int_2^x \sinh 2y \, \mathrm{d}y$$

in the case where:

(a) x = 5

(b) x = 9

3. Find the determinant of the following 3x3 matrix:

$$\begin{pmatrix} 1 & 6 & 4 \\ 3 & 1 & 7 \\ 9 & 4 & 5 \end{pmatrix}$$

Section B

1. Determine the following limit:

$$\lim_{x \to +\infty} \frac{\sin x}{x^2}$$

2.	Prove Pythagoras' Theorem.
3.	Describe the Gram-Schmidt Algorithm.
